

How to get plesk account information using mysql

1. Getting all the domain account information from Plesk

```
mysql -uadmin -p`cat /etc/psa/.psa.shadow` -D psa -e "select login,password,home from sys_users INNER JOIN accounts on accounts.id=sys_users.account_id;"
```

2. Get client login details from Plesk.

```
mysql -uadmin -p`cat /etc/psa/.psa.shadow` -D psa -e "select login,password from clients INNER JOIN accounts on accounts.id=clients.account_id;"
```

3. Getting all mail account login information

```
mysql -uadmin -p`cat /etc/psa/.psa.shadow` -D psa -e "SELECT CONCAT_WS('@',mail.mail_name,domains.name) as email ,accounts.password FROM domains,mail,accounts WHERE domains.id=mail.dom_id AND accounts.id=mail.account_id ORDER BY domains.name ASC,mail.mail_name ASC;"
```

4. Creating/deleting/updating mail accounts using command line

create mail account

```
/usr/local/psa/bin/mail -c USER@DOMAIN.COM -passwd PASSWORD -mailbox true -cp-access true
```

update mail account

```
/usr/local/psa/bin/mail -u USER@DOMAIN.COM -passwd NEWPASS
```

remove mail account

```
/usr/local/psa/bin/mail --remove USER@DOMAIN.COM
```

5. Mailing list management

creating mailing list

```
/usr/local/psa/bin/maillist --create MYLIST -domain DOMAIN.COM -passwd_type plain -passwd PASS -notify false -email LISTADMIN@DOMAIN.COM
```

Adding/removing members to the mailing list.

```
/usr/local/psa/bin/maillist -u MYLIST -domain DOMAIN.COM -members add:NEW@DOMAIN.COM
```

```
/usr/local/psa/bin/maillist -u MYLIST -domain DOMAIN.COM -members del:NEW@DOMAIN.COM
```

Getting list members

```
/usr/local/psa/bin/maillist -i MYLIST -domain DOMAIN.COM
```

Removing list

```
/usr/local/psa/bin/maillist -r MYLIST -domain DOMAIN.COM
```

6. Managing databases.

create database

```
/usr/local/psa/bin/database --create DBNAME -domain DOMAIN.COM -server localhost:3306 -add_user  
DBUSER -passwd PASS
```

remove database

```
/usr/local/psa/bin/database -r DBNAME
```
